Albertina & Matilda

Designed by
Inma Bermúdez

The Albertina&Matilda collections, created by Inma Bermúdez, are born from a material as pure as earth. They have been shaped through a handcrafted manufacturing process to achieve unique pieces that, by combining them creatively, offer multiple decorative compositions.

Las colecciones Albertina&Matilda, creadas por Inma Bermúdez, nacen de un material tan puro como la tierra. Se le han dado forma a través de una fabricación artesanal para lograr piezas únicas que combinándolas de forma creativa entre ellas ofrecen múltiples composiciones decorativas.

RECOMMENDATIONS

‘Albertina and Matilda’ are handcrafted ceramic elements, from which natural products with a great range of colours and irregular textures are obtained. Traditionally, they are recognized as a design element of great versatility in Mediterranean architecture, as they can be used indoors to create dividers and decorative elements.

“ALBERTINA” PLACEMENT RECOMMENDATIONS

- Installation of the pieces using a cement mortar or polyurethane-based chemical adhesives.
- Installation of expansion joints approximately every 4 m.
- Cleaning the visible surface with a sponge and water during the installation process.
- Once the installation has been completed —after 8 hours and once the bonding material has dried—, during the following two days, wet the pieces installed and apply a specific oil for terracotta and clay.

“MATILDA” PLACEMENT RECOMMENDATIONS

- Installation of the pieces using a cement mortar or polyurethane-based chemical adhesives.
- Installation of joints with a minimum thickness of 10 mm between pieces, using ribbed stainless steel rods or fibreglass with a diameter of 4-6 mm, in all horizontal joints and every three vertical rows.
- Installation of expansion joints approximately every 4 m.
- Cleaning the visible surface with a sponge and water during the installation process.

RECOMENDACIONES

“Albertina y Matilda” se tratan de elementos cerámicos artesanales de fabricación manual, obteniendo productos naturales de gran variedad cromática y texturas irregulares. Tradicionalmente están reconocidos como un elemento de diseño de gran versatilidad en la arquitectura mediterránea, por sus posibilidades de utilización en interior para la formación de divisorias y elementos decorativos.

RECOMENDACIONES DE COLOCACIÓN “ALBERTINA”

- Instalación de las piezas con mortero de cemento o adhesivos químicos en base poliuretano.
- Realización de juntas de dilatación aproximadamente cada 4 m.
- Limpieza de la superficie vista con esponja y agua durante el proceso de instalación.
- Finalizada la instalación, transcurridas 8 horas y con el material de agarre seco, humedecer las piezas instaladas durante los 2 días siguientes y aplicar aceite específico para barros y terracotas.

RECOMENDACIONES DE COLOCACIÓN “MATILDA”

- Instalación de las piezas con mortero de cemento o adhesivos químicos en base poliuretano.
- Realización de juntas de mínimo 10mm de espesor entre piezas, utilizando varillas corrugadas de acero inoxidable o fibra de vidrio de entre 4 y 6 mm de diámetro, en todas las juntas horizontales y cada 3 hiladas verticales.
- Realización de juntas de dilatación aproximadamente cada 4 m.
- Limpieza de la superficie vista con esponja y agua durante el proceso de instalación.
